PROFILE

Skilled web developer focused on building clean, user centered websites that deliver real value. I blend strong front-end and back-end skills with a growing knowledge of AI and machine learning to explore smarter, more dynamic web solutions. Known for writing solid code, learning fast, and always improving the user experience.

SKILLS

Web Development

Proficient in HTML, CSS, JavaScript, Bootstrap, React, TypeScript, Node.js, Express.js, Embedded JavaScript, version control, API integration, and MongoDB. Experienced in developing dynamic and responsive web applications.

SQL

Skilled in database design, querying, and management using **SQL** for data storage and retrieval in web applications.

AI and ML enthusiast

Data analysis and **machine learning** with Python. Familiar with libraries like **Pandas**, **NumPy** and **Streamlit** for data manipulation and visualization.

Copywriter | Content Strategist

Copywriter skilled in creating persuasive and engaging content for websites, ads, blogs, and marketing campaigns. Experienced in brand storytelling, SEO, and digital marketing.

Python Programming

Good understanding of Python and Django Framework including data structures, algorithms, and object-oriented programming. Used extensively in web development projects and in data science.

Version Control

Proficient with **Git** and **GitHub** for managing code versions and collaboration on projects.

Problem-Solving

Strong analytical and problem-solving skills, especially in developing web-based solutions and tackling complex data challenges.

PROFESSIONAL EXPERIENCE

2025

Netwalkers NG, Software Developer

Contributed to internal software projects by writing, testing, and debugging code. Supported system maintenance and collaborated with other developers to ensure smooth platform functionality. Participated in team sprints while balancing hybrid work and ongoing training programs.

Alusoft Technologies Ltd

2022 – 2023

Web Developer

Developed responsive websites and optimized functionality, improving user experience and operational efficiency. Collaborated with the team to write clean, maintainable code and ensure seamless integration of web components.

Ibadan, Nigeria

2022	Front End Instructor <i>Delivered hands-on training in HTML, CSS, and JavaScript, mentoring students to build responsive web interfaces and improve their coding proficiency.</i>	Ibadan, Nigeria
2023 – present	Freelance As a web developer and AI enthusiast, I have worked on various personal projects and collaborated with others on innovative solutions. My experience spans building dynamic websites, exploring AI applications, and contributing to team projects that solve real-world problems.	

PROJECTS

CliniquePlus EMR Software Contributed to the development of a modern Electronic Medical Records (EMR) system designed to streamline patient data management and enhance clinical workflows. Focused on building features that support efficient record keeping, improve healthcare delivery, and meet the unique needs of medical professionals.
Hospital Management System Passionate and results-driven web developer with a strong background in user-focused design and a growing interest in AI solutions. Skilled in problem-solving, innovation, and adapting to new technologies, with a focus on creating impactful, data-driven web experiences.
EcoImpact analyser This is a web app that uses AI and data visualization to help users reduce their environmental footprint with actionable insights and recommendations.
Synergy Forge This is an AI powered platform that enables users to create and manage virtual teams across various industries, including real estate, finance, and technology. This tool enhances decision-making, automates complex tasks, and streamlines business operations all for free.
Nelly's Blog Nelly's Blog is a leading platform for African culture, heritage, and entertainment, delivering edgy, humorous, and politically aware content while also serving as a powerful online advertising network for brands.
